Mr. Robert Dent
Anaconda Minerals Company
555 Seventeenth Street
Denver, Colorado 80202

Dear Mr. Dent:

Re: Kennecott Liability, Carr Fork Mine, ACT/045/004, Tooele County, Utah

In a meeting with several of the Division technical staff on March 27, 1986, the division of the Carr Fork minesite into an area to be reclaimed by Anaconda and a separate area to be kept in operational status by Kennecott was discussed.

At present, Anaconda has bonding and reclamation responsibilities for both of these areas. In order for the liability for the upper Pine Canyon minesite to be transferred to Kennecott, the Division must receive and approve the following:

1. A large scale boundary map of the entire area, delineating the areas of responsibility of both parties.
2. Small scale maps of each disturbed area, in sufficient detail to show all facilities including transportation and utility corridors. Total disturbed acreage for each area must be clearly indicated.
3. An acceptable reclamation plan for the Pine Canyon area.
4. Adequate surety to cover reclamation requirements on both areas.

Surety requirements, particularly for the Pine Canyon area, cannot be determined until the detailed maps and reclamation plans have been submitted and approved.

ACT/045/004
April 2, 1986

The Division realizes that it will not be an easy process to separate the site into two separate permits, but we will be glad to provide any assistance that we can. Please contact me or Susan Linner with any questions.

Sincerely,

L. P. Braxton
